TARIFF FORMAT

A. Sheet Numbering - Sheet numbers appear in the upper right corner of the Sheet. Sheets are numbered sequentially. However, new Sheets are occasionally added to the Tariff. When a new Sheet is added between Sheets already in effect, a decimal is added. For example, a new Sheet added between Sheets 14 and 15 would be 14.1.

B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each Sheet. These numbers are used to determine the most current Sheet version on file with the New Jersey Board of Public Utilities. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. that the New Jersey Board of Public Utilities follows in their Tariff approval process, the most current Sheet number on file with the Board is not always the Tariff Sheet in effect. Consult the Check Sheet for the Sheet currently in effect.

C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

2.
2.1.
2.1.1.
2.1.1.A.
2.1.1.A.1.
2.1.1.A.1.(a).
2.1.1.A.1.(a).I.
2.1.1.A.1.(a).I.(i).
2.1.1.A.1.(a).I.(i).(1).

D. Check Sheets - When a Tariff filing is made with the New Jersey Board of Public Utilities, an updated check Sheet accompanies the Tariff filing. The check Sheet lists the Sheets contained in the Tariff, with a cross reference to the current revision number. When new Sheets are added, the check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this Sheet if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some Sheets). The Tariff user should refer to the latest check Sheet to find out if a particular Sheet is the most current on file with the New Jersey Board of Public Utilities.

SECTION 4 – BASIC SERVICES AND RATES

4.1 Call Timing for Usage Sensitive Calls

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- 4.1.1 Calls are measured in durational increments identified for each service. All calls which are fractions of a measurement increment are rounded-up to the next whole unit.
- 4.1.2 Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s).
- 4.1.3 Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.

4.2 Distance Calculations

The Company does not offer distance sensitive services.

4.3 Rate Periods for Time of Day Sensitive Services

The Company does not offer time of day sensitive services.

4.4 Service Availability

Tariffed services are presently available in the local exchange service areas of the following incumbent local exchange carriers: Verizon New Jersey, Inc.

SECTION 4 – BASIC SERVICES AND RATES (Cont'd)**4.5 Network Exchange Bundled Service****4.5.1 General**

The Company offers local exchange only as part of a bundle or package of telecommunications services. All packages include local service, long distance service (interstate and intrastate toll), and selected custom calling features. Voice mail and optional Internet access¹ may be available with some packages at an additional price. The aforementioned services are only available as part of the bundled service offering and are not available on an individual service basis. Customers will be billed directly by the Company.

IDT provides its Network Exchange Bundled Service via the use of the unbundled network elements (“UNEs”) of the incumbent local exchange carrier(s) (“ILEC”). The rates for UNEs may vary depending on the ILEC and the UNE “zone” that a particular consumer is located within. These UNE zones (or similarly named designation) are on file with the Commission by the ILEC. Accordingly, IDT may charge different rates for the same service plan depending on which ILEC’s UNE zone its consumer is located within. Where IDT offers the same plan at different rates depending on the UNE zone, it shall so designate the distinction in this Tariff. IDT concurs in the UNE zones of the ILEC presently on file with the Commission and in any subsequent modifications. (N)

Unless specifically noted otherwise, IDT’s service is residential service to be used primarily for voice service. The company reserves the right to adjust a customer’s service upon appropriate customer notification. If it is determined that usage is not consistent with residential voice applications, the Customer’s service will be assessed a \$50.00 monthly recurring data usage charge or be disconnected. For the purpose of this service plan, Customer’s use of more than 4,000 minutes per month for non-voice applications including, but not limited to Internet access, shall cause the data usage charge to be imposed. (T)

¹ Voice mail, Internet access and Interstate service are not regulated by the Board.

SECTION 4 – BASIC SERVICES AND RATES (Cont'd)

4.5 Network Exchange Bundled Service (Cont'd)

4.5.1 General (Cont'd)

The Company provides Customers with the option of obtaining a Primary Line and Secondary Line per account:

A. Primary Line

The initial residential local exchange access line per account.

B. Secondary Line

The second or additional residential local exchange access line, billed to the same address as the Primary Line. (D)

Should a Customer with both lines opt to disconnect the Primary Line, the remaining Secondary Line will automatically convert to a Primary Line with all features and functionality of such, and at the Primary Line monthly recurring rate.

SECTION 4 - BASIC SERVICES AND RATES

4.5 Network Exchange Service, (Cont'd.)

4.5.2 Optional Calling Features

The features in this section may be purchased by the subscriber, subject to availability. (c)

Anonymous Call Rejection (ACR) - Anonymous Call Rejection (ACR) allows a customer to reject calls from callers who have blocked the display of their telephone numbers from a Caller ID device. ACR discourages anonymous calls, since callers must allow their numbers to be displayed in order to reach you.

When a customer activates Anonymous Call Rejection, callers who have blocked the display of their numbers will hear an announcement telling them that the Customer are not accepting blocked calls. They will be instructed to hang up, unblock their number and dial again if they wish to reach you.

A customer will hear a confirmation announcement whenever the Customer activate or deactivate the Anonymous Call Rejection feature.

Call Block - Provides ability to block up to a certain number of calls (telephone numbers) from reaching the subscriber.

Call Forwarding Variable - Call Forwarding Variable allows the Customer to choose to reroute incoming calls to another specified telephone number. The Customer must activate and deactivate this feature. (c)

SECTION 4 - BASIC SERVICES AND RATES

4.5 Network Exchange Service, (Cont'd.)

4.5.2 Optional Calling Features (Cont'd)

Call Return - Call return stores the number of the most recent incoming call (including unanswered calls) to a Customer's number. This allows a Customer to dial back any missed or unanswered telephone calls. (c)

Call Trace - allows Customers to key in a code that alerts the network to trace the last call received. The traced telephone number is automatically sent to the company for storage for a limited amount of time and is retrievable by legally constituted authorities upon proper request by them. By contacting the company the Customer can use this application to combat nuisance calls.

Call Waiting - Call Waiting provides a tone signal to indicate to a Customer already engaged in a telephone call that a second caller is attempting to dial in. It will also permit the Customer to place the first call on hold, answer the second call and then alternate between both callers.

Call Waiting Deluxe - provides the Customer with Call Waiting, Caller Id and Call Waiting Id.

Caller ID - allows a Customer to see a caller's number previewed on a display screen before the call is answered allowing a Customer to prioritize and or screen incoming calls. Caller ID records the number, date and time of each incoming call - including calls that aren't answered by the Customer. Caller ID service requires the use of specialized CPE not provided by the company. It is the responsibility of the Customer to provide the necessary CPE.

Caller ID with Name - allows a Customer to see a caller's name previewed on a display screen before the call is answered allowing a Customer to prioritize and or screen incoming calls. Caller ID records the name, date and time of each incoming call - including calls that aren't answered by the Customer. Caller ID service requires the use of specialized CPE not provided by the company. It is the responsibility of the Customer to provide the necessary CPE. (c)

SECTION 4 - BASIC SERVICES AND RATES

4.5 Network Exchange Service, (Cont'd.)

4.5.2 Optional Calling Features, (Cont'd.)

Three Way Calling - Permits the Customer to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The Customer initiating the conference controls the call and may disconnect the third party to reestablish the original connection or establish a connection to a different third party. The feature may be used on both outgoing and incoming. (C)

Caller Identification Blocking: Allows the name and number of the calling party to be blocked from being transmitted when placing outbound calls.

Per Call Blocking: To activate per-call blocking, a Customer dials a special code prior to placing a call. Blocking will be activated for that outgoing call only.

Per Line Blocking: When blocking is established on the line, it can be deactivated by dialing a code before each call. This one call unblock allows the name and/or number to be sent for that one call only. Customers who choose per line blocking for the first time will not be charged the nonrecurring charge. After the first time, customers requesting per line blocking will pay a nonrecurring charge for each line equipped with per line blocking. Per line blocking will be provided free to law enforcement and domestic violence agencies and individual victims of domestic violence upon request. (C)

SECTION 5 - MISCELLANEOUS SERVICES AND CHARGES, CONT'D.**5.5 Public Telephone Surcharge**

In order to recover the Company's expenses to comply with the FCC's pay telephone compensation plan effective on October 7, 1997 (FCC 97-371), an undiscountable per call charge is applicable to all intrastate calls that originate from any pay telephone, not presubscribed to the Company, used to access Company provided services. This surcharge, which is in addition to standard tariffed usage charges and any applicable service charges and surcharges associated with service, applies for the use of the instrument used to access Company provided service and is unrelated to the service accessed from the pay telephone.

Pay telephones include coin-operated and coinless phones owned by local telephone companies, independent companies and interexchange carriers. The Public Pay Telephone Surcharge applies to the initial completed call and any reoriginated call (e.g., using the "#" symbol). The Public Pay Telephone Surcharge does not apply to calls placed from pay telephones at which the Customer pays for service by inserting coins during the progress of the call.

Whenever possible, the Public Pay Telephone Surcharge will appear on the same invoice containing the usage charges for the surcharged call. In cases where proper pay telephone coding digits are not transmitted to the Company prior to completion of a call, the Public Pay Telephone Surcharge may be billed on a subsequent invoice after the Company has obtained information from a carrier that the originating station is an eligible pay telephone.

5.10 Directory Listing Services

5.10.1 General

The following rates and regulations apply to standard listings in light face type in the white Sheets (alphabetical section) of the telephone directory and to the Directory Assistance records of the Company.

Directory listings are limited to such information as is essential to the identification of the listed party. The listing of a service, commodity, or trade name is not permitted unless it is the name, or an integral part of the name, under which the Customer does business.

A listing is limited to one line in the directory, except where in the judgement of the Company, more than one line is required to identify the Customer properly. In such cases, the additional lines required are provided at no extra charge.

Dual name listings are permitted as a regular directory listing for residential service.

Listing services are available with all classes of main telephone exchange service.

5.10.2 Listings

A. Primary Listing

One listing, termed the primary listing, is included with each exchange access line or each joint user service.

Special types of Additional Listings include:

Duplicate Listings - A listing of another name by which the customer is known such as a nickname, abbreviated name, a name commonly spelled in more than one way, and a name consisting of several words which the public commonly rearranges. The listing may complete or in a cross reference form.

5.10.2 Listings (Cont'd)

D. Nonlisted Service

Non-listed service means that the Customer's telephone number is not listed in the directory, but does it appear in the Company's Directory Assistance Records.

The Company will only complete calls to a nonlisted number, if requested by a caller, during the course of a directory assistance call completion service.

When the Company agrees to keep a number unlisted, it does so without any obligation. Except for cases of gross negligence or willful misconduct, the Company is not liable for any damages that might arise from publishing a non-listed number in the directory or disclosing it to some. If, in error, the telephone number is listed in the directory, the Company's only obligation is to credit or refund any monthly charges the Customer paid for nonlisted service.

The subscriber indemnifies (i.e., promises to reimburse the Company for any amount the Company must pay as a result of) and save the Company harmless against any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the publication of a non-listed service or the disclosing of said number to any person.

5.11 Carrier Presubscription

5.11.1 General

Carrier Presubscription is a procedure whereby a Customer designates to the Company the carrier which the Customer wishes to be the carrier of choice for intraLATA and interLATA toll calls. Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier. Presubscription does not prevent a Customer who has presubscribed to an IntraLATA or InterLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative long distance carrier on a per call basis.

A new Customer will be asked to select intraLATA and interLATA toll carriers at the time the Customer places an order to establish local exchange service with the Company. The Company will process the Customer's order for service. All new Customers' initial requests for intraLATA toll service presubscription shall be provided free of charge.

If a new Customer is unable to make selection at the time the new Customer places an order to establish local exchange service, the Company will read a random listing of all available intraLATA and interLATA carriers to aid the Customer in selection. If selection is still not possible, the Company will inform the Customer that he/she will be given 90 calendar days in which to inform the Company of his/her choice for primary toll carrier(s) free of charge. Until the Customer informs the Company of his/her choice of primary toll carrier, the Customer will not have access to long distance services on a presubscribed basis, but rather will be required to dial a carrier access code to route all toll calls to the carrier(s) of choice. Customers who inform the Company of a choice for toll carrier presubscription within the 90 day period will not be assessed a service charge for the initial Customer request.

Customers of record may initiate a intraLATA or interLATA presubscription change at any time, subject to the charges specified in 5.11.5 below. If a Customer of record inquires of the Company of the carriers available for toll presubscription, the Company will read a random listing of all available intraLATA carriers to aid the Customer in selection.
